HABERKORN

HSCALE
Haberkorn Logistics Solutions

Simple and secure – top-notch inventory management

Straightforward, convenient and secure arrangement – the H-Scale load cell cabinet from Haberkorn offers all this and more. Flexible and individual product storage ensures the optimal availability and issuing of articles.

Access to the products is entirely transparent and takes a matter of seconds thanks to intuitive handling. The fully automated process cuts transit and waiting times as well as shrinkage, which in turn saves costs.

Choose the H-Scale load cell cabinet from Haberkorn and benefit from modern technology combined with the experience of a reliable partner.

Proven solution —————
Is there much work involved?

Everything at a glance

How do I maintain an overview?

Tailored to your needs

How can that be done?

Automated reliability

How is that ensured?

HABERKORN

Proven solution – space-saving and straightforward

The H-Scale load cell cabinet is not only easy to operate – installing the machine is also straightforward and quickly taken care of. As this is an autonomous solution, a power connection is all you need. The requirements for exchanging data with Haberkorn have already been met inside the machine.

Your benefits at a glance

- Simple connection to a normal power outlet
- Space-saving system – high effectiveness and small footprint
- Proven solution in industry and construction
- Haberkorn secures your supply with the VMI process (vendor-managed inventory)

Everything at a glance – flexible and transparent

The Haberkorn Dashboard enables you to be independent and flexible. You manage your data – no matter whether it's user authorisations, consumption data or stock queries. The good thing about it: you always have everything available at a glance and therefore complete transparency at all times.

Your benefits at a glance

- Manage all data with one login
- Stock queries in real time
- Simple cost centre allocation
- Overview of all Haberkorn systems

Tailored to your needs – individual and independent

We fill the load cell cabinet with the articles that are right for you, entirely to suit your individual requirements. That way, we ensure that your employees have constant access to products at decentralised supply points at any time. Stock volumes are always optimal – not too much, not too little. It goes without saying that we are pleased to take care of the inventory management process for you on request.

Your benefits at a glance

- Customer-specific configuration of the H-Scale load cell cabinet
- Room for a wide range of different products, including fragile or bulky items
- Use of customer-specific fob chips on request
- Rapid adjustment and changes in cabinet stock possible

Automated reliability – solid and contemporary

Tried and tested, secure and nonetheless individual: that's all possible with the H-Scale load cell cabinet. On request, Haberkorn replenishes the machine and looks after the system to ensure constant availability. Continuous software updates keep the machine in tune with the latest developments. Products can be retrieved 24 hours a day, 7 days a week.

Your benefits at a glance

- Automatic reordering of articles
- Access-protected storage
- Continuous function monitoring of the machine by Haberkorn
- Support and replenishment by Haberkorn

It's this easy

1 Open the cabinet

Employees identify themselves with their fob chip every time they want to retrieve an item. This is checked by the system and the door is automatically unlocked.

2 Remove products

The employee removes the required products. The changes in stock levels, the employee data and the time of removal are recorded, thus ensuring optimal transparency.

3 Automatic reordering

Stock levels are identified by weighing and sent to Haberkorn. Once a defined minimum level is reached, a reorder is triggered.

4 Reliability of supply

Haberkorn delivers the goods promptly and refills the load cell cabinet. You can therefore rely on supply at all times.
