

Gas outlet casing of huge turbocharger

Application

Gasket for hydraulic control block, 10 bar, 160°C, hydraulic fluid. Several narrow bars are a challenge.

Problem

Originally used fiber gasket failed due to max. application temperature after some weeks in service.

NEW MATERIALS

Gas outlet casing of huge turbocharger

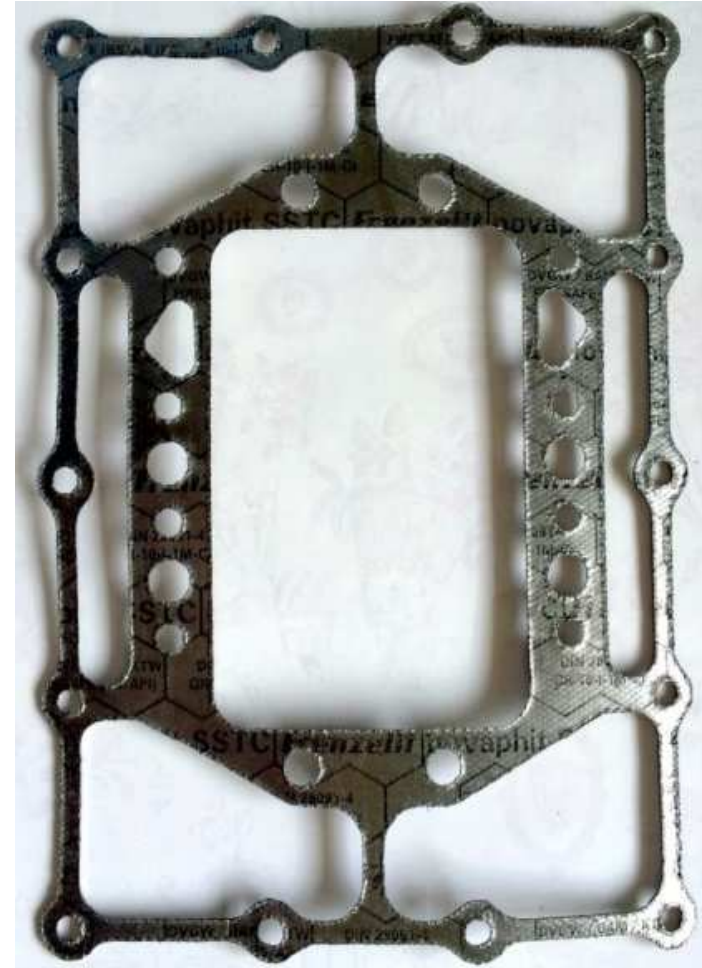

Solution

novaphit® SSTC offers reliable performance according to changing loads and max. temperature.

Expanded metal reinforcement allows processability of small gasket width.

Result

Hydraulic control blocks are running successfully with **novaphit® SSTC 1.0 mm**.
