Inventory management made easy
H-Scan online scanner

HABERKORN

H SCAN
Haberkorn Logistics Solutions

Fast and simple
Inventory management the easy way

With the H-Scan online scanner, you are deciding on a proven system that is simple and convenient to operate and ensures secure data transfer. By simplifying and automating internal processes, you save time and have more resources for other tasks.

With the handy, easy-to-use online scanner from Haberkorn, a small innovation in your order handling enables you to make a big impact on your overall process.

Simple system
Straightforward operation, ordering possible without additional software

Error-free ordering
Secure transmission of the required
articles in a matter of seconds

All details at a glance
Everything under control with
online management

HABERKORN

Simple system
For use any time, any place

You scan the barcode in the barcode catalogue or on the container with the online scanner and send off the order data, wherever you happen to be. That's easier than a telephone call. Neither a PC nor additional software is required, just the online scanner from Haberkorn.

Your benefits at a glance
- Intuitive handling of the device
- For use any time, any place
- Can be combined with barcode catalogue and Haberkorn labels

Error-free ordering
Secure and reliable

As soon as you have completed the scan, everything is performed electronically, guaranteeing error-free transmission of the data. You can add further information using the online scanner itself or later on in the online shop. You also have the option of authorising the order before it is transmitted to Haberkorn.

Your benefits at a glance
· Secure data transmission 24/7
· Proven solution in industry and construction
· Electronic data capture without time-intensive typing
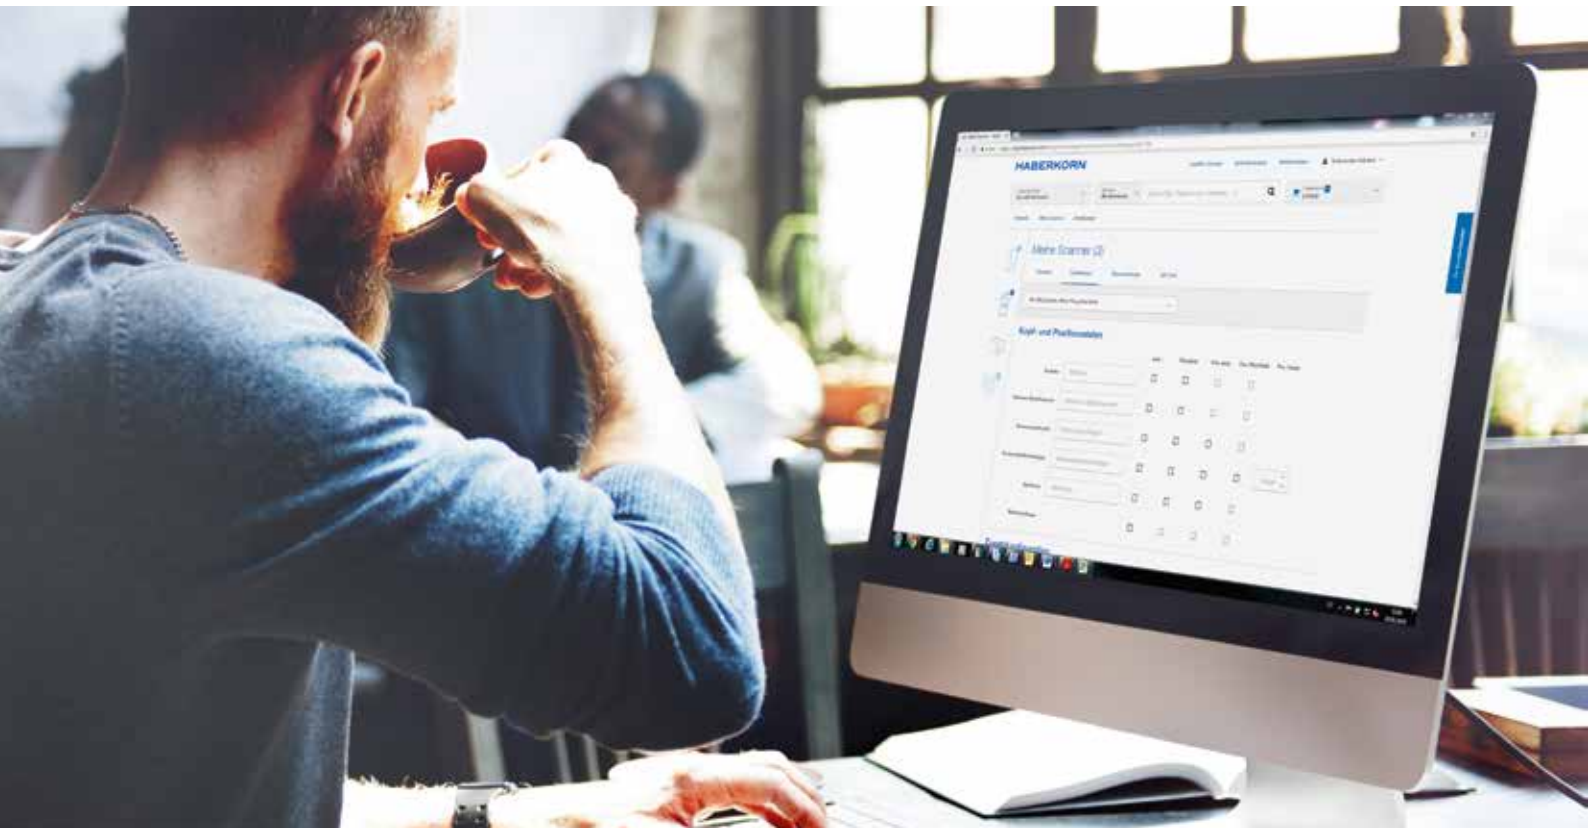

All details at a glance
Transparency at all times

With the Haberkorn dashboard, we offer you the optimal platform for managing your data. From creating and printing your own barcode catalogues and QR codes to managing goods receipts, cost centres and order initiators, for example – this is where you're flexible and simultaneously have a full overview.

Your benefits at a glance
- Ideal combination of the H-Scan online scanner with the Haberkorn online shop
- Always up to date thanks to the transparency of consumption data
- Management of key order data on the Haberkorn dashboard

Flexible and convenient ordering
Individually tailored to your needs

The barcode catalogue is a simple method for making the ideal selection from a large number of products and defining these as standard. This means you can compile your frequently required products as a barcode catalogue in the Haberkorn online shop and print it as a document. The articles can then be found rapidly and ordered conveniently with the online scanner in a matter of seconds.

As well as being able to create barcode catalogues easily, you can also generate and print QR codes with your required information in the online shop. All you have to do is read the QR code required for the respective process using the H-Scan online scanner – and you immediately have the data on the device. That's how easy ordering can be!

Always the right solution
Intelligent inventory management with Haberkorn

It makes sense to keep items in stock if they are needed immediately. A Haberkorn racking system – tailored to suit your specific requirements – is the ideal solution in this case. However, if you can wait for a day, you can save yourself the cost of keeping stocks by ordering the items as and when they are needed. In this case, you create and use your individual Haberkorn barcode catalogue for this purpose – fast, simple and error-free.

Is your requirement critical?

Yes – inventory management

Items must be available at short notice

No – barcode catalogue

Next-day delivery is fast enough

HABERKORN
