HABERKORN
EINFACH BESSER

Our Expertise for Skis and Ropeways.

For decades, Haberkorn has been a partner to the international ski and ropeway industry when it comes to rubber foils for skis and liners for rope sheaves. Our strengths include comprehensive advisory services as well as excellent collaboration with well-known suppliers.

Ropeway sheave liners in closed design

Closed sheave liners offer a long service life and a high level of comfort as well as very smooth running. They are suitable for bolted side plates as well as side plates with retaining rings.

Photo: Semperit

Ropeway sheave liners with one open side

Open sheave liners can be fitted without having to remove the side plates. This makes them ideal for sheaves which are cast in one piece.

Side liners and other special versions

Along with other versions for special purposes, we stock three-piece liners for rope carriers, for example, which enable the replacement of individual parts rather than the entire sheave.

Ropeway lining profiles (lining strips)

Lining profiles and lining strips are used in ropeway drive, return, deflection, guide and tension bullwheels.

Special applications

Our expertise in the ropeway sector also benefits customers from other sectors. Examples include designs for cranes, wire saws, conveyors, wire rope hoists and amusement park facilities.

Ski foils

The vibration-damping characteristics of our rubber foils play a crucial role in the modern sandwich construction of skis and snowboards.

Other products for ski construction

Our special range for ski manufacturers covers various ski components such as fabrics, plastics, running surfaces, steel edges and inserts.

SEMPERIT 

Highlights

Comprehensive advice from specialists

We offer a high level of technical know-how and practice-oriented special solutions for all applications. Our experienced specialist will be pleased to advise you.
