

# Simple and round the clock

## The H-Save automatic dispenser

**HABERKORN**

# Simple access – controlled product dispensing

Round-the-clock access, no waiting times: The H-Save automatic dispenser is the ideal machine for dispensing products – particularly personal protection items and tools.

Your employees log in at the machine and retrieve the products individually. Article storage is therefore access-protected, while retrieval is simple and takes just a few seconds. In addition, the modular construction of the machine allows flexible replacement of the product range.

Take advantage of a modern dispensing system and choose the H-Save automatic dispensers from Haberkorn!

**Autonomous system** —————  
Is there much work involved?

**Everything at a glance**

How do I maintain an overview?

**Tailored to your needs**

How can that be done?

**Round the clock**

How is that possible?

# Autonomous system – straightforward and space-saving

Installing the machine is just as straightforward as operating it. A normal power outlet is all you need as the requirements for exchanging data with Haberkorn have already been taken care of inside the dispenser. The system itself is otherwise completely autonomous.

## Your benefits at a glance

- Straightforward installation, only a power supply is needed
- Space-saving system – big effect with a small footprint
- Widely used in industry and construction
- VMI process (vendor-managed inventory) safeguards stock levels

# Everything at a glance – flexible and transparent

We provide the platform, you manage your data. From the overview of your consumption data through to creation and maintenance of your own user data – it couldn't be more flexible.

Alongside the management options in the Haberkorn online shop, you can also see the operating status of all your Haberkorn systems. That means you always have everything in view.

## Your benefits at a glance

- Convenient and simple user creation and management
- Rapid access to retrieval data
- Allocation to cost centres possible
- Overview of system activity

# Round the clock – reliable and automatic

The H-Save automatic dispenser automatically reorders items, ensuring that your employees have a constant supply of the materials they need – 24 hours a day, seven days a week. Any changes to the product range stocked in the machine are entirely straightforward. On request, Haberkorn also takes care of machine replenishment.

## Your benefits at a glance

- Articles are reordered by the dispenser itself
- Access by means of personal ID
- Reliability of supply thanks to a partner with many years of experience
- Permanent monitoring of the machine by Haberkorn

# It's this easy

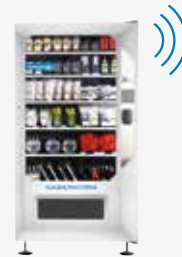

## 1 Very simple function

Employees use their fob chip to retrieve items. The relevant employee data, retrieval time and the products retrieved are automatically recorded.

## 2 Automatic reordering

The automatic dispenser sends the retrieval data to Haberkorn, where the replenishment orders are generated and picked.

## 3 Delivery

Haberkorn delivers the goods at the right time in the right quantity.

## 4 Constant availability

The dispenser is refilled and products can be retrieved 24/7.
